THE RACE IS ON!

Continued development is natural to us. Our products are the core of D.A.D Sportswear. Therefore, we collaborate with famous Swedish sailing personalities to continue our development and produce the very best quality, comfort and performance promo wear. In our language we say The race is on!

Adventure sailor Bengt Tarre is the skipper of the 65 feet long Celeste of Solent (Farr65r), our model for this catalogue. Several times per year, Bengt takes his crew on rough voyages

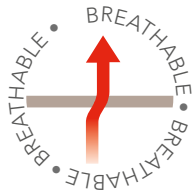

all over the world. Bengt holds a Master of Yacht Unlimited and is also a certified Master of Yacht Instructor. When he's not a sea, he works as a boating and business lawyer.

Anders Nordström is the skipper of Arcona 430, a boat specially built for Team UK Syversen. Together with his team, he does both offshore and inshore yacht

racing. Anders and his team have won the Round Gotland Race twice, the Göteborg Offshore Race, they are two-time Nordic Champions as well as Swedish Champions in several different classes. Anders has worked as a sailmaker for more than 25 years. Furthermore, he is part owner of UK Syversen, Sweden's leading sailmakers.

We are privileged to have Bengt Tarre and Anders Nordström on our D.A.D-team and we wish them the best of luck with the upcoming season!

BREATHABLE

This is a material that both breathes and releases moisture. A soft and flexible material that can be washed many times without losing its shape.

COOLDRY

This is a material that both breathes and releases moisture. Cooldry also stands out because of its quick-drying nature, ensuring a feeling of freshness even during physical exertion.

SOFTSHELL

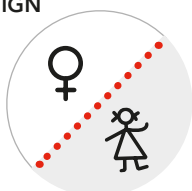

Softshell is a modern material that provides optimal freedom of movement. The material is wind and waterproof with good breathability. Softshell is a soft and stretchable 3-layer laminate, a material that dries very rapidly.

32 DEGREES

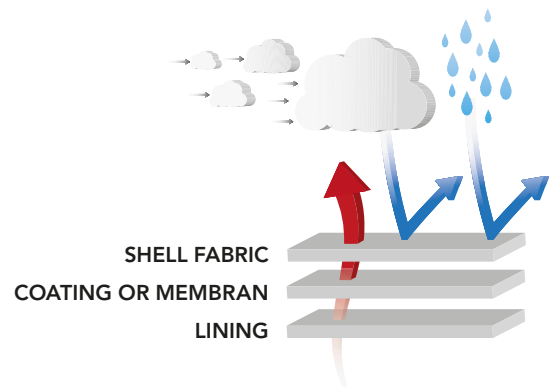

Garment made of PCM, Phase Change Material. Due to the unique microcapsules in the fabric construction a 32 C temperature can be obtained inside the garment no matter the outside temperature.

LADIES DESIGN

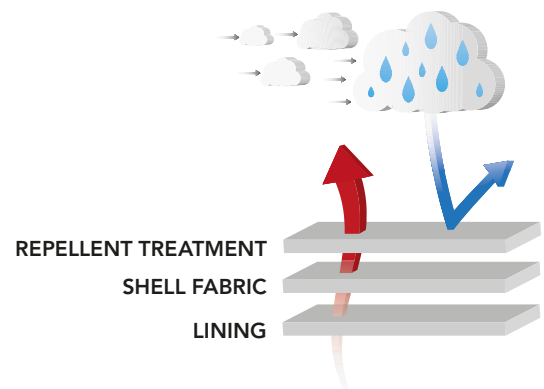

CHILDRENS SIZE

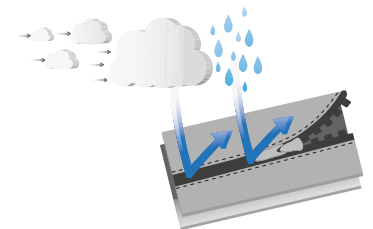

WIND- / WATERPROOF & BREATHABLE

These three functions are found in most outer garments, which have a special coating or membran on the inside of the outermost layer that stops water and wind while allowing the material to breath.

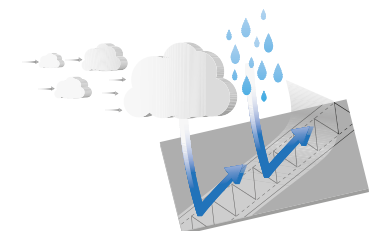

WIND- / WATER REPELLENT & BREATHABLE

By applying this method, a windproof with a water repellent surface is obtained. This can be done chemically or through weaving technologies in the material.

WIND- / WATERPROOF ZIPPER

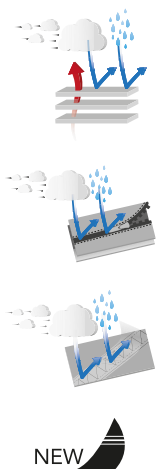

WIND- / WATERPROOF TAPED SEAM

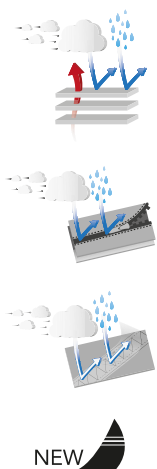

990 black

TACTICAL 10 JACKET 131050

Durable 3-layer offshore jacket designed for rough conditions. Without lining to improve flexibility. Our most tailored jacket ever! WASHING INSTRUCTIONS

You can do quite a lot to maintain the look and life of your clothes. Washing your clothes according to the washing instructions will keep them looking good for much longer. Always wash dark garments separately and use a non-bleaching washing agent to protect both the garment and environment. The garments in our collection have many uses and include everything from T-shirts to jackets in a variety of materials. This means that they must be cared for individually in order to maintain their colour and application. All our garments come with clear washing and care instructions.

IRONING

The symbol of an iron indicates that the garment can be ironed or mangled. The number of dots in the iron is the temperature recommended for the garment. Do not iron directly onto a printed garment or on its reverse.

WASHING IN WATER

The symbol of a tub indicates that the garment is machine washable or can be washed by hand. The tub will either show the recommended washing temperature or a hand symbol for hand wash. All our garments can be spindried. A crossed over tub symbol means that the garment cannot be washed in water.

CHLORINE BLEACHING

Triangle – the garment can be chlorine bleached. The letters in the triangle make up the chemical term for chlorine. A crossed over triangle means that the garment cannot be chlorine bleached.

DRY-CLEANING

Circle – the garment can be dry-cleaned. The letter inside the circle refers to the recommended washing solution. A crossed over circle means that the garment cannot be dry-cleaned.

DRYING

Circle in a square – the garment can be tumble dried. A crossed over symbol means that the garment cannot be tumble dried. Remember that tumble drying wears the garment and increases the amount of shrinking.

The pictures in the catalogue and the actual products may differ slightly in colour due to the methods of photography and printing used. The scenic pictures may also differ somewhat from the pictures of the products as a result of varying light conditions, in which case we recommend that you refer to the product pictures.

DEMAND THE BEST FROM YOUR CORPORATE WEAR

Soft shell, zip guard, articulated sleeves and taped seams. With the right equipment working together is easy come storm or calm, rain or shine.

DAD is a Swedish brand of functional corporate wear for leading edge companies, inspired by the life at sea. Lavish quality garments that always show you at your best angle. No matter how, where or when you choose to be seen...

Lying in the sun on the fore deck. Behind the helm with the water swirling. Or having a warming cup of tea at a meeting right inside the cabin.

DAD makes clothes to be seen in for all imaginable occasions!
